

Organic Medicinal Mushrooms Product Range

CONCORD SUNCHIH GPSP --2 in 1 Formulated Immune Booster

What is Ganoderma lucidum?

Ganoderma Lucidum (known as Lingzhi in China or Reishi in Japan) is a strain of medicinal mushroom. "Seng Nong's Herbal Classic", the oldest book on oriental herbal medicine, classifies Ganoderma Lucidum as the one herb which is effective for multiple diseases and is mostly responsible for maintaining and restoring body-balance with almost no unfavourable side-effects. Thus making it the "King of Herbs" giving it a higher ranking than Ginseng.

Ganoderma is non-toxic, has no side effects and can be taken for a reasonable length of time. If Ganoderma is taken with other Western medication, it will complement and enhance their therapeutic properties. At the same time it will minimise their side-effects.

Indications:

- Supports and enhances the immune system.
- Promotes stamina and endurance.
- Antioxidant.
- Relieves the symptoms of allergies.
- Relieves sleeplessness
- Relieves the symptoms of hay fever.

CONCORD SUNCHIH PREMIUM GPSP --3 in 1 Formulated Therapeutic Immune Activator

What ARE GANODERMA SPORES?

Ganoderma Spores are the seeds produced and released by the Ganoderma fruit when it reaches maturity. Ganoderma Spore Powder is extremely precious and is very difficult to collect in the natural environment. Approximately 100kg of Ganoderma Lucidum log plants are needed in order to collect 1kg of spore powder.

Ganoderma Spores are protected by double cell walls, Concord Healthcare adopted innovative technology to successfully crack open the cell walls and extract the spore powder. The spore powder is found to be 75 times more effective than the Ganoderma fruit body itself.

Indications:

- Provides natural immune system support.

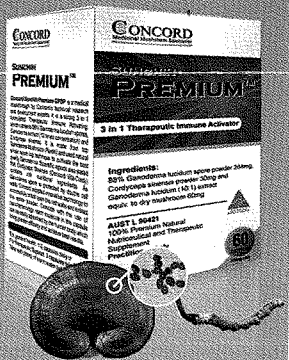

- Helps maintain stamina and endurance levels naturally.
- Enhances antioxidant activity and anti-inflammatory
- Provides temporary relief from rheumatoid arthritis pain.
- Formulated to support kidney.
- Formulated to support the liver metabolism and acts as a liver tonic.
- Assists in the maintenance or improvement of a healthy heart, normal blood pressure, normal cholesterol levels, normal blood sugar levels, a healthy respiratory system and peripheral circulation.

Ingredients:

- 88% Ganoderma lucidum spore powder 264mg,
- Cordyceps sinensis powder 30mg and
- Ganoderma lucidum (10:1) extract equiv. to dry mushroom 60mg

Dosage:

As a therapeutic supplement, 3 capsules twice a day.
For health maintenance, 1 capsule twice a day.

CONCORD Vita-Cordy --Vitality Activator

What is Cordyceps Sinensis?

Cordyceps Sinensis comes from the grassy plateaux of Northern China. While a certain type of caterpillar larvae is hibernating during the winter, a long and thin parasitic fungus finds its way into the larvae. The fungus then grows to maturity and kills the caterpillar. This is why it has the name of "winter worm, summer grass" in Chinese.

Cordyceps Sinensis is a highly prized medicinal herbal ingredient in Traditional Chinese Medicine (TCM). It has been used as an aphrodisiac and a treatment for a variety of ailments from fatigue to cancer. TCM regarded this ingredient as having an excellent balance of yin and yang as it apparently has both animal and vegetable elements. In recent years, its popularity began to soar when a number of world-class athletes ascribed part of

their record-breaking achievement to a daily supplement of Cordyceps Sinensis.

Indications:

- Provides natural immune system support.
- Helps support the respiratory system.
- Provides temporary relief from coughing.
- Helps maintain stamina and endurance levels naturally.

Formulated to support the kidneys

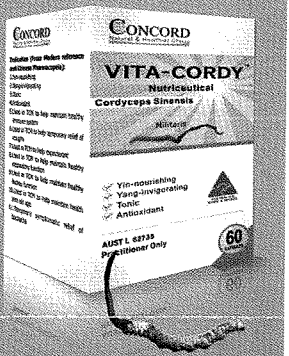

- Formulated to support the liver metabolism and acts as a liver tonic.
- Helps calm nervous tension, stress and mild anxiety.

CONCORD Bio-PSP 2 in 1 Formulated Liver Detox Enhancer

What is Trametes Versicolor (PSK/PSP)?

Trametes Versicolor (formerly known as Coriolus Versicolor) is sometimes called "Turkey Tail". It is known as Yunzhi in China and Kawaratake in Japan. This mushroom has long been prescribed by Traditional Chinese Medicine healers for its excellent properties in strengthening the immune system.

Modern clinical usage in Japan and in research for Polysaccharide-peptide (over 400 published studies) suggest that it stimulates immune function, promotes stamina and antioxidant activities, supports the liver, and has no contra-reaction with drugs when used with western medications.

Indications:

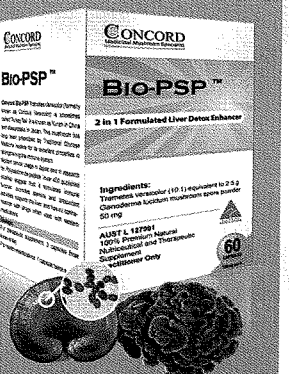

- Provides natural immune system support.
- Formulated to support the liver metabolism and acts as a liver tonic.
- Enhances antioxidant activities.
- Helps maintain stamina and endurance levels naturally.
- Aids in the improvement and maintenance of general well-being.

Ingredients:

- Trametes versicolor (10:1) equivalent to 2.5 g and
- Ganoderma lucidum mushroom spore powder 50 mg

Dosage:

For therapeutic supplement, 3 capsules three times a day.
For health maintenance, 1 capsule twice a day.
