

TRADITIONAL ACUPUNCTURE FOR THE SPIRIT

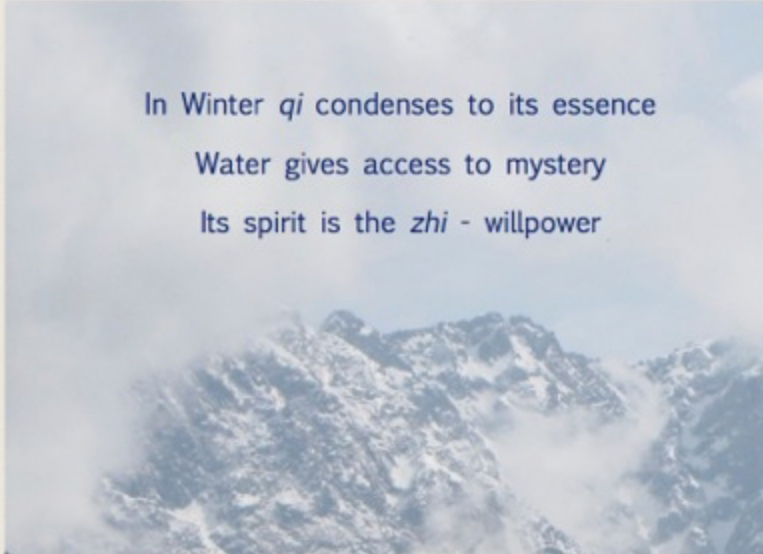

understanding how the five elements move
recognising how they show themselves in our patients
& learning to use spirit points to encourage their potential

When someone is experiencing the dark night of the soul, how do we, as acupuncturists, help them find their courage?

JR Worsley's Taoist style of acupuncture is especially helpful for patients with mental, emotional & spiritual issues - for those suffering from fear, depression or crisis of faith.

This seminar will focus on:

- deepening our understanding of water's nature - including *Yin, Jing & Zhi*
- diagnosing a water imbalance in patients by traditional methods
- expanding our knowledge of kidney, bladder, ren & du meridian points to assist our patients in their struggle to find their flow

In Winter *qi* condenses to its essence
Water gives access to mystery
Its spirit is the *zhi* - willpower
